SAKSHI KORE

Software Engineer | Full-Stack & AI/ML Developer | Frontend & UI/UX Designer
Mumbai, India • +91 91375 52062 • sakshikore16@gmail.com • sakshi-kore • sakshikore16

SUMMARY

Software engineer with strong foundations in computer science, full-stack development & machine learning. I work across the stack, from responsive frontends & cross-platform mobile apps to scalable backend services and real-time systems. I'm comfortable with data structures, algorithms and system design, and I apply AI/ML techniques such as predictive modelling and computer vision to build practical features. I write maintainable code, collaborate well in Agile teams, and learn new tools quickly..

EXPERIENCE

Software Developer Intern — Harrier Information Systems Pvt. Ltd *Jul 2025 – Dec 2025 | Mumbai*

- Built and deployed a production cross-platform mobile document scanner and OCR app using C# and .NET MAUI, owning the work from UI screens to release and cutting manual document processing effort by ~60%.
- Developed Node.js and SQL REST APIs powering the mobile app, with optimized indexing and query tuning that improved backend throughput by 35%.
- Redesigned the user verification flow from 5 steps to 2 (60% fewer), reducing friction and drop-off across mobile and backend touchpoints.
- Worked in Agile sprints with cross-functional teams, delivering 8+ features with 100% on-time milestones & zero critical regressions.

Web Developer & Digital Marketing Intern — Digital Loop Marketing *Jul 2024 – Oct 2024 | Mumbai*

- Built responsive client-facing web apps with React.js and MongoDB, lifting 30-day user retention by 45%.
- Optimized metadata, component rendering and asset delivery, driving a 3.8× rise in inbound engagement within 2 months.
- Created a reusable UI component library that cut landing-page development time by 30%.
- Worked closely with the marketing team to turn campaign briefs into live, high-performing pages for multiple clients.

TECHNICAL PROJECTS

Collaborative Whiteboard App

React.js • WebSockets • Node.js • Docker • Redis • Keycloak SSO

- Built a containerized real-time multi-user drawing canvas with sub-18 ms latency, letting 50+ users collaborate in one room at 60 FPS even with 1,500+ active strokes.
- Designed a WebSocket room architecture with delta compression that cut network packet overhead by 48%.
- Secured access with Keycloak SSO (OAuth2/OIDC) and JWT verification, enforcing Admin, Editor and Viewer roles.

Spotify Music Telemetry Platform

Python • Scikit-Learn • Pandas • NumPy • Streamlit • Plotly

- Analyzed 1.2M+ Spotify tracks to predict song popularity, training a gradient-boosted regression model that reached 94.2% R^2.
- Engineered 8 acoustic features (valence, energy, tempo and more) and reduced dimensionality by 35% while keeping 98% of the variance.
- Grouped songs into vibe profiles (e.g., Deep Focus, Late-Night Chill) using K-Means and PCA, served with sub-12 ms cached inference.

Mood-Based Music Player

React.js • Node.js • CNN • Web Audio API • OpenWeatherMap API

- Built an app that reads facial expressions through webcam with client-side CNN (68 landmarks, 7 moods, under 200 ms) to curate playlists.
- Combined detected mood with live weather data in recommendation engine and added 60 FPS audio waveform using the Web Audio API.
- Kept all webcam frames in local browser memory, so no biometric data leaves the device.

ENTREPRENEURSHIP & PROJECT MANAGEMENT

Revive Facts — College Venture Concept

Ideation • Business Planning • Roadmapping

- Took a business idea from problem statement to a structured plan covering audience, value proposition, revenue model and go-to-market.
- Broke the vision into phased milestones with clear priorities, deliverables and success metrics across product, tech and growth.
- Validated the concept through peer and mentor feedback and refined the plan over multiple iterations.

SKILLS

Programming: C++, Python, Java, C#, SQL, JavaScript (ES6+), TypeScript

Frontend & Mobile: React.js, Next.js, .NET MAUI, Tailwind CSS, HTML5 Canvas, Web Audio API

Backend & Data: Node.js, Express.js, REST APIs, WebSockets, Keycloak SSO, PostgreSQL, MongoDB, MySQL, Redis, Firebase

AI/ML & Tools: Scikit-Learn, Pandas, NumPy, CNN, Computer Vision, Streamlit, Docker, AWS S3, Git, Linux, Postman, CI/CD

Soft Skills: Project Management, Leadership, Communication, Teamwork, Problem Solving, Time Management, Adaptability, Ownership

EDUCATION

B.Tech - CSE (AI/ML & Data Science): ITM Skills University, Navi Mumbai | CGPA: 8.48 / 10 *2023 – 2027*

HSC (Class XII, Science): Prakash College of Science & Commerce, Mumbai *2021 – 2023*

ICSE (Class X): C.N.M. School & N.D. Parekh School, Mumbai *2021*

ACHIEVEMENTS & CERTIFICATIONS

- Finalist, PAN IIT IMAGINE Hackathon (PIWOT 2025): top 72 teams out of 15,000+ participants across India (top 2%).
- HackerRank certified in Python (Basic) and JavaScript (Basic); AI Tools & Prompt Engineering Masterclass, be10x.

LANGUAGES & INTERESTS

Languages: English, Hindi, Marathi

Interests: Reading, Travelling, Drawing, Cooking
